

REPLIFLO™ WRINKLE ANALYSIS

WHAT IS REPLIFLO™?

REPLIFLO™ is a convenient, easy to use, two-part system containing a non-toxic silastic resin similar to the material that is used by clinical labs to record skin texture and wrinkles.

WHY WOULD I USE REPLIFLO™?

The appearance of each person's skin changes with age in its own way depending on various internal and external influences, such as genetics, smoking, sun damage, and product use. Having an objective way to measure the skin's texture is an important tool in providing appropriate product solutions. REPLIFLO™ provides the first important step in an effective method for viewing wrinkles and estimating the AGE of your customer's skin. The REPLIFLO™ Wrinkle Analysis Kit gives you a chance to interact with your customer, educate them on their skin's aging process, and introduce products that can slow or repair skin damage.

HOW DO I USE REPLIFLO™ IN A PROMOTION?

REPLIFLO™ can be used in a variety of ways to interact with your customer.

- Cosmetic Counters
- Spas
- In-store Promotions
- Direct Mailers
- Direct Sales Consultants

All of these ideas can be combined with CuDerm's exclusive Cu-Technology to give your customer a more detailed analysis of their skin. This information allows you to offer specific product recommendations and tailor future promotions targeting your customer.

WHAT PRODUCTS CAN I PROMOTE WITH REPLIFLO™?

REPLIFLO™ can be used to promote:

- Anti-Aging Products
- Wrinkle Creams
- Hand Creams
- Cellulite Creams
- Stretch Mark Products
- Facial Sun Screen Products
